White Pine Co.
Lincoln Co.
Nye Co.

#9844 - May 7, 1963.
Rocky soil in small dry wash just above Lake Mead, between Las Vegas Wash and Boulder Beach, Clark Co., Nevada.
Larrea Zone.

Coarse, glandular, bushy-branched, brittle annual. Disk yellow. Rays 8-13, white.

Perityle emoryi Torr.

Euphorbia: (10) ✓ /

9845 - May 9, 1963

Nye Co., Nevada.

With Atriplex, Ceratoides, Grayia, and Tetradymia on gentle slope 6.5 miles northwest of Springdale.

Rigidly and intricately branched, very thorny, broad low shrubs up to about 5 dm. tall and 12 dm. wide. Twigs green. Corolla white. Anthers yellow.

Menodora spinescens Gray

Twp. 10 S., R 46 E.

Lycium - (7) - photo #1

562.4

9846 - May 10, 1963
Mineral Co., Nevada. Sloping, sandy, gravelly, granitic beach along the west side of Walker Lake, about 19 miles north of Hawthorne. Elevation about 4300 feet. Leaves forming a rosette flat on the ground. Perianth rather light yellow.
Twp. 10 N., R. 29 E.

Eriogonum pusillum T. & G.

pickled.

Eriogonum (35)

795.5

9847 - May 10, 1963
Mono Co., Calif. Rocky, granitic hillsides along a dry wash just above the west shore of Topaz Lake, in Pinus monophylla - Artemisia tridentata community. Elevation 5100 feet. 7 miles north of Coleville.
Thorny shrubs 1-2 m. tall. Petals and filaments pink; anthers yellow
Twp. 9 N., R. 22 E.
Prunus fasciculata (Torr.) Gray

9-12- May 13, 1963

Washoe Co, Nevada.
Sandy benchland
overlooking the Truckee
River, with atriplex,
Sarcobatus, and Tetradymia,
1 mile northwest of
Nixon. Elevation about
4000 feet. Twp. 23 S, R. 23 E.
Plants prostate. Corolla
with pink-purple to bright
red-purple limbs and
light yellow throats.

Nama aretioides (H. & A.) Brand
var. multiflorum (Heller) Jeps.

✓

Nama 35 ✓

9849 – May 12, 1963.
Same place as 9848.
Corolla pink. lavender,
with light yellow
throat. Plant usually
branched at the base,
with ascending branches.
practically sinuous,

Phacelia bicolor Torr. ✓

Phacelia cf bicolor, (35) ✓

9850. May 12, 1943
Washoe Co., Nevada.
On southeast facing
limestone cliffs along the
highway just above the
upper end of Pyramid
Lake and about 3 miles
northeast of Nixon.
Elevation about 4000 feet.
Twp. 23 N., R. 23 E.
Pungent-scented, much branched
low shrubs, mostly 1-2 dm.
tall. Flowers dull white,
faintly marked with
dull lavender, mostly
closed when collected
(mid-day, cloudy), but
some partly open.
Leptodactylon pungens (Torr.) Nutt.
(b)

9851 - May 12, 1913 Washoe Co., Nevada. Gravelly, somewhat calcareous and alkaline east slope, with Sarcobatus, overlooking the west side of Winnemucca Lake (a playa), 11 miles north of Nixon. Twp. 24 N., R. 23 E. Elevation about 3700 feet. Corolla bright pink-purple, marked with yellow and crimson near the base of the lower lip, withering persistent.

Mimulus nanus H. & A.

Mimulus nanus? (35)

9852 – May 12, 1963
Washoe Co., Nevada,
in the shelter of Sarcobatus
bushes on gravelly,
somewhat calcareous and
alkaline east slope over-
looking the west side of
Winnemucca Lake (a
playa), 11 miles north
of Nixon. Twp. 24 N., R 23 E.
Elevation about 3900 feet.
Flowers white.

Hutchinsia procumbens (L.) DC.

Astragalus iodanthus Wats.
var. iodanthus
det. R.C. Barneby

Draba (12) 2.1.85 ✓

9853- May 12, 1963. Washoe Co., Nevada. Same place as 9851. Plants with many prostrate stems from a perennial taproot, forming a rosette mat on the surface of the ground, the pedundles more or less ascurgent. Corolla lavender-purple, the banner marked with white. Pods marked with reddish brown on a yellowish background, firm, compressed at right angles to the plane of the sutures, 1-celled, broadly and shallowly sulcate on the non-seed-bearing suture. Leaves blue-glaucous. 10

Pl. 7 to # 8 - Successive benches marking old shore lines at the northeast end of Smoke Creek Desert (a playa) a few miles northwest of Gerlach, in Washoe Co. Nev. Sarcobatus and atriplex in the foreground

---

Pl. 10, 11, & 12 - Juniperus occidentalis, base of Warner Mts. s. of Cedarville, Modoc Co. Calif.

9854 May 12, 1963
Washoe Co., Nevada
Along a small irrigation ditch 16 miles northwest of Gerlach. Trees up to about 12 m. tall, with dark, shaggy bark. Mature dead leaves from last year elongate and narrow. Elevation about 4400 feet +

Salix amygdaloides Anderss.

photo #9
Salix a. amygdaloides (7)

9655 July 14, 1923

Modoc Co., California
In rocky, felsitic soil
with sagebrush and
scattered Juniperus occi-
dentalis, on gentle slope
leading up to the west
base of the Warner Mts.
near Cedar Pass, between
Cedarville and Alturas,
altitude 4900 feet. (9 miles
Alturas)

Heads yellow. Rays and
involucral bracts each 7–13.
Plants abundant.

Crocidium multicaule Hook.

Crocidium 20 ✓

9856 - May 15, 1963

Humboldt Co., Nevada.

With Sagebrush and Rabbitbrush on partly stabilized sand dunes 10 miles northeast of Winnemucca.

Elevation about 4500 ft. Plants mephitic. Corolla with lavender limb and light yellow throat. Most other Nevada species except Lloydia, not yet flowering.

Phacelia bicolor (Torr.) Vats.

✓

Phacelia (12)

9857 - May 16, 1963
Lander Co., Nevada
With scattered sagebrush
on rather barren slopes,
30 miles north of Austin.

Elevation about 5200 feet
Leaves gray-green, pungent.
Flowers white or faintly
tinged with lavender.
Most plants not yet in
flower

overlooking the Reese River

Phlox hoodii Rich.

U750

Phlox (2) ✓

Photos 1 & 2. Looking southeast towards the north end of the Monitor Range. Sagebrush in the foreground, then pinon-juniper, then only scattered timber in mountain tops. The mountains rise to more than 10,000 feet here.

9858 - May 17, 1963
White Pine Co., Nevada
Aspen, rocky (limestone)
southwest slope at the west
base of the Duck Creek Mts.,
and Carbine Duck Creek,
about 8 miles northeast of
McGill. Elevation about
6600 feet. Twp. 19 N., Range
61 E., ~~about~~ S. 25.
Much branched, very thorny,
rounded low shrubs mostly
3-6 dm. tall. Young twigs green.
Sepals 3-5. Petals 1-3,
seldom 4, slender, white.
Glossopetalon nevadense
Gray
Phila. #3
Glossopetalon nevadense. (20)

9859 - May 17, 1963
White Pine Co., Nevada.
With sage brush and stunted junipers along the east side of the Duck Creek Mts., near North Creek, about 10 miles northeast of Mt. Gilbert, Twp. 19 N., Range 65 East, & about S. 20. Elevation about 6800 feet.
Flowers faintly lavender-tinted, almost white, distinctly smaller, and the leaves less pungent, than in some related species, such as P. hendii
Phlox muscoides Nutt. ✓

Dupl. (5)
